Sugs Lloyd Secures Strategic Fault Passage Indicator Order from DGVCL

Strengthens Presence in Gujarat and Accelerates Growth Across India

New Delhi, Sep 21, 2025: Sugs Lloyd Limited, a leading integrated EPC player focused on electrical transmission and distribution, solar and civil projects, today announced that it has secured a turnkey contract from Dakshin Gujarat Vij Company Limited (DGVCL). The prestigious order involves the supply, installation, testing, and commissioning of Fault Passage Indicators (FPIs) to significantly enhance fault detection capabilities across 7 KV to 13 KV overhead lines.

This contract marks a pivotal milestone for SUGS Lloyd, strengthening its foothold in Gujarat—one of India's most progressive states in power distribution—and further fuelling the company's nationwide strategy of driving innovation and reliability in energy infrastructure.

Key Project Highlights:

- Installation of state-of-the-art FPIs using insulated hot sticks (20 KV) at every 600-metre unit
- Designed to boost grid resilience, minimise downtime, and ensure faster restoration during outages
- Completion scheduled within two months, following a 45-day mobilisation period

The deployment of FPIs is expected to transform the fault management process by providing utilities with real-time detection, thereby reducing outage durations and improving consumer satisfaction. For DGVCL, one of Gujarat's key distribution companies, the project will play a crucial role in advancing operational efficiency and delivering more reliable electricity to millions of households and businesses.

"We are proud to partner with DGVCL on this landmark project that will enhance grid reliability and optimise outage management," said **Mr. Santosh Shah, Chairman, SUGS Lloyd**. "This contract is not just another project win—it reflects our commitment to developing and implementing innovative EPC solutions that directly contribute to India's power sector modernisation and energy transition goals."

Mr. Satyakam Basu, CEO, SUGS Lloyd, stated: "Deepening our presence in Gujarat is an important step in our expansion strategy. Our work with DGVCL complements our broader efforts across India to deliver tailored EPC and grid automation services. Backed by our engineering

expertise and on-ground execution strength, we remain committed to delivering projects that set new benchmarks in precision, safety, and reliability.”

About Sugs Lloyd: Founded in 2009 and headquartered in Noida, Uttar Pradesh, SUGS Lloyd Limited is recognized for its expertise in delivering comprehensive EPC services in the renewable energy and power transmission sectors. The company’s core offerings include solar power project execution, electrical transmission & distribution systems, and civil infrastructure development. The company is committed to quality, innovation, and supporting India’s energy transition with reliable EPC execution.
